1. MOUNTING

To prevent electric shock or instrument failure, always turn off the power before mounting or removing the instrument.

1.1 Mounting Caution

(i) Always unplug the instrument from the outlet and wait at least 1 minute before starting to use the instrument, and also when using the instrument control terminals. This will allow the instrument to cool down.

(ii) Do not connect or disconnect the instrument to the power supply during use. Turn off the power before connecting or disconnecting the instrument.

(iii) Do not connect or disconnect the instrument to the power supply during use. Turn off the power before connecting or disconnecting the instrument.

(iv) Do not connect or disconnect the instrument to the power supply during use. Turn off the power before connecting or disconnecting the instrument.

(v) Do not connect or disconnect the instrument to the power supply during use. Turn off the power before connecting or disconnecting the instrument.

1.2 Mounting Procedure

(i) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(ii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(iii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(iii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

1.3.3 Procedures of Mounting and Removing

(i) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(ii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(iii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(iv) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

1.3.4 Mounting procedures

(i) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(ii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(iii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(iv) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

1.4.4 Terminal cover usage:

(i) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(ii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(iii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(iv) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

1.5.5 Removing procedures

(i) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(ii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(iii) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

(iv) Carefully read the installation manual before use. Make sure that the instrument is mounted in a safe location and that the cables are routed properly.

2. WIRING

2.1 Warnings

(i) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

(ii) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

(iii) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

2.2.2 Warning messages

(i) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

(ii) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

(iii) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

2.3.3 Warning messages

(i) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

(ii) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

(iii) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

2.4.4 Warning messages

(i) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

(ii) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

(iii) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

2.5.5 Warning messages

(i) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

(ii) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.

(iii) The product is designed for use with industrial equipment, and is not suitable for use in the presence of flammable or explosive gases, dusts, or fumes. It is also not suitable for use in areas where there is a risk of explosion.
